Brief Company Overview

About the Company

The Progressive Self-Service Systems (an I.T. Group company) develops and produces integrated high tech solutions for the automation of servicing for customers of banks, retail outlets and other business sectors. The company's highly qualified developers, design engineers, process planners, and designers use an effective systematic approach during project development, implementation and maintenance acting at the junction of engineering, manufacture, IT integration, and marketing.

The company possesses all required resources: its own approved manufacture of self-service systems, a design engineering bureau developing new equipment models and implementing unique tailor-made projects and a professional knowledge of software products. Cooperation with our partners in the development and integration of software and service support also makes for the effective implementation of integrated projects.
